one of three officals in Radom whose resignations the local chap-ter of Solidarity had demanded. It was announced that the mayor of Radom also had resigned, al-though his removal had not been emanded by the union.

Proviocial Gov. Roman Mackowski and police chief Stefan Mozgawa have also resigned. The demand for the resignations was linked to harsh reprisals against workers who took part in 1976 food price riots in Radom.

The official Polish news agency PAP announced that Premier Wojciech Jaruzelski had accepted the resignation of Mr. Mackowski and that Mr. Prokopiak had sub-mitted his resignation March 4. Mr. Mozgawa's resignation was disclosed Sunday.

Among other issues, the union is demanding the erection of a monu-ment marking the 1976 riots, in-vestigation of the failure of State Prosecutor Lucjen Czubinski to act against those who mistreated workers during and after the riots, and the allocation of more money

for housing construction. Polish Communist Party leader Stanislaw Kania said in a Warsaw speech Saturday that the nation is "overcoming [its] difficulties, solv-ing problems, and liquidating looming threats." He said that talks with Soviet leaders during the Communist Party congress last month in Moscow had strengthened relations between Poland and its Warsaw Pact neighbors and deepened the "understanding of the Polish situation and the efforts we are undertaking to overcome

the crisis. Also Saturday, Warsaw's lead-ing oewspaper, Zycie Warszawy, criticized the party leadership for being unable to formulate a plan to satisfy rank-and-file party members. "The lack of a sensible pro-gram of action that could satisfy the basic party organizations re-leased ounerous spontaneous initiatives with which nowadays the

Hijackers Free Captives in Syria After Libya Reneges on Refuge

Zia Renews Charge of Collusion by Afghanistan Aides

DAMASCUS - After a 13-day ign of terror, three Pakistani hijackers surrendered to Syrian au-thorities late Saturday night and released an estimated 102 hostages, the victims of the longest such aircraft kidnapping. It was an ordeal that ended only after a final dramatic twist.

Io exchange, the hijackers gained the release of 54 political prisoners from the jails of Pakistan's president, Mohammed Zia ul-Haq. The hijackers surrendered to the Syrians only at the last moment after Libya reneged on its earlier agreement and refused en-try to them and the 54 convicts. In Islamabad, President Zia said

In Islamabad, President Zia said Sunday that Syria was granting temporary refuge to the hijackers and the 54 political prisoners, whose plane instead returned to Syria. The Syrian government newspaper Tishrin reported that "the Pakistani prisoners will be allowed to leave to any country of their choice."

A Pakistan government spokes-man said Saudi Arabia planned to fly the released hostages there Monday, treat them as "state guests" and take them to Mecca, the Moslem holy city, before they return to Pakistan.

Hostages Procounced Fit

A few minutes after the hisckers surrendered, the exhausted hostages began leaving plane one by one. They were disheveled but seemed to be in good physical con-dition and spirits. They were all on their feet. Only a few accepted as they walked down the ramp. Syrian doctors at a military hospital in Damascus pronounced the hostages fit Sunday,

The hijackers, led by Salamullah Kahn, surrendered at about 11:30 p.m. to the chief Syrian negotiator. Brig Gen. Mohammed Khouli. This was three hours after the Li-byan government of Col. Moamer Qadhafi, in a reversal of an earlier decision, kept another plane carrying the 54 Pakistani prisoners from entering Libyan airspace. Under an agreement reached Thursday between Pakistan and the hijackers, the 54 prisoners were to be flown to Libya in exchange for the

"It was very clear," said Sen. Patrick J. Leahy, D-Vt., "the admina risky military strategy. The economic assistance pack-age was discussed briefly during a istration has not thought through the implications of its policy in El Salvador for the rest of Latin America.

Answer Questions

The witnesses, he added, were unable to answer questions about what the administration would do if the Duarte government were overthrown, or if Cuba were to escalate its involvement.

"What I found disturbing was the lack of a bottom line," agreed Sen. Warren Rudman, R-N.H "There don't seem to be any cor tingency plans, and none of the witnesses would assure us that adc tional military and economic a d would not be necessary."

Sen. Rudman added that he thought the committee and the Senate would support President Reagan's policy in El Salvador, but only if the administration did not treat Congress to a series of incremental increases in U.S. involvement

Sen. Rudman and other senators said they were particularly dis-turbed by a statement in Mr. Stoessel's testimony, which was not distributed by the State Department, indicating that the level of assistance to El Salvador had to respond "not only to the present situation, but to the potential of the other side to create further violence."

In San Salvador, Mr. Duarte reported in a news conference Fri day that important new evidence has been uncovered concerning the multiple murders in December of three U.S. nuns and a lay worker.

Mr. Duarte said that Salvadoran investigators last week found the site of the manders and uncovered lingerprints, several bullets and a piece of tooth. U.S. officials said that three bul-

lets have been sent to the FBI in Washington for analysis in its bellistics laboratory. Fingerprints said by the Salvadoran govern-ment to belong to 20 members of the Treasury police and National Guard stationed in the area at the time of the murders have also been carned over to the FBI, sources

stalk to the Soviet Union at every turn. For the Europeans, the initial contacts with the Reagan administration appear with the reagan autunistration appendic to have been useful, too. The Europeans came away feeling that, although Presi-dent Reagan lacked finesse in handling foreign affairs, he was not a Dr. Strangelove. They were quite relieved that he was prepared to let Mr. Haig run the foreign policy machinery. After being conditioned for years to expect strong rivalries in Washington, the Europeans

tration's penchant for attacking Moscow found that Mr. Haig has no serious con-tender; that Richard V. Allen was oo at every turn without holding open the likelihood of resuming a serious dia-Henry A. Kissinger or Zhigniew Brzezinski On specifics, the Europeans departed somewhat shorthanded because the Reagan administration is still grooing And the Europeans, in different ways, for answers on a number of key policy also effectively let the new administration know that, while they too were critimatters.

But on some issues, they were reas cal of Soviet-bloc involvement in El Sal-vador, they believed Washingtoo was sared: on the neutron bomb (despite what Defense Secretary Caspar W. Weinberger said, there will be no push overdoing its alarm; that if the United for its deployment anytime soon); on viet Union, El Salvador seemed a particthe Gulf (the Americans will increase their presence but do not plan any moves that might upset the oil producers or lead to an early confrontation with his top aides, but was hardly surprising. the Russians): on the Middle East (10 The consultations will continue in vari-

and no desire for a major confrontation with the Europeans on their approach to the region; agreement to reassess the situation in the summer after the Israeli elections).

U.S. Lowers Alarm Level After Key Europeans' Visits

The start of a new U.S. administration has produced, by now, a highly stylized protocol, to which Mr. Haig adhered. A pledge is made in Washington to im-prove consultations with the allies as if the preceding administrations had for-Whether Mr. Reagan and Mr. Haig will, in fact, do better with the alliance than their predecessors remains to be seen. The past, however, is replete with failed DIOIDISE

President Richard M. Nixon launched his administration with an early trip to Europe, but found by the time he left office that relations had sharply deteriorejed, particularly with France. President Jimmy Carter sent Vice President Walter F. Mondale to Europe during their first week in office to underscore his loyalty to the alliance. Mr. Carter mis loyalty to the annance, wir. Carter was barely on speaking terms with some of the allied leaders by the time be departed

For their part, the Europeans are anyious to compare notes on the new lead-ers in Washington. There is a sort of competition to see who gets to Washington first, whose visit garners most press attention; and who seems to strike it off best with the new president and his secretary of state. Inversely, which govern-ment will find itself in Washington's

doghouse? which foreign minister will be seen as the chief antagonist? Foreign Minister Emilio Colombo of Italy, one of Europe's most scalor politi-cal figures, had the distinction of being

the first to Washington (Jamaica and South Korea had audiences before Italy, but Rome was the first from NATO). Prime Minister Margaret Thatcher of Britain was the first NATO head of government (preserving the image of the "special relationship"); Foreign Minis-ter Hans-Dietrich Genscher of West Germany had what appeared to be the most detailed and substantive discus-sions with Mr. Haig and received the cet of France produced the most satisfypathy with his anti-Soviet concerns than did the others.

A Sounding Board

Although Mr. Colombo's visit on Feb. 12-13 received the least press attention, it was important because it provided a useful sounding board for Mr. Haig who was then plotting the worldwide campaign to expose Soviet bloc involvement in El Salvador. He seized upon Mr. Colombo's visit to inveigh against Moscow and to justify his demand that the Kremlin agree to some "code of conduct" if relations are to improve, a position he later modified

The Italian statesman was publicly and privately supportive of a tougher

NEW YORK - An American who was among the hostages freed from a Pakistani airliner over the weekend is under indictment on federal heroin smuggling charges, the U.S. attorney's office in New York disclosed.

The State Department revealed Sunday that a second man, a mustachioed mystery hostage, is not an American although he was traveling on a U.S. passport. Officials indicated he may be a Canadian

The mystery man was using a passport under the name of Law-rence Clifton Mangum, who is actually a furniture mover from Brooklyn, New York, and has never left the United States, according to his wife. U.S. Attorney Edward Korman said the indictment charging

former hostage Craig Richard Clymore, 24, also known as Craig Richards, of Lake Forest, Calif., was unsealed Tuesday.

He was among nine persons named in the indictment. Four of them were arrested a week ago in California and were to be brought here after a hearing in Los Angeles on March 19. The indictment charges that hashish oil was smuggled into the United States from Pakistan and Afghanistan. The smuggling of heroin also was charged, but its source was not specified.

Mr. Clymore, arriving at a Damascus hotel after release from a Syrian military hospital, would not talk with reporters about the indictment, which was publicized only Saturday because it was felt the disclosure could jeopardize his life during the hijacking. He arrived here with U.S. diplomats who also escorted Freder-

ick Hubbell, a lawyer from Des Moines, Iowa, and Geoffrey Balkind, who said he is with the United Nations and whose nationality was not known. With them, using his sweater to try to conceal his face from photographers, was the man U.S. officials said might be using a false passport.

motive, but with a critical differonly a few isolated incidents. A Star of David was scribbled on a ence: there are almost no Jews left. Poland, which had perbaps 80 per-Solidarity poster. A crude poem was scrawled on a wall in northern cent of world Jewry in the Middle Ages and 3.5 million Jews only 41 Warsaw; it said that Lecb Walesa, the Solidarity union leader and a years ago, now has an estimated 5,000 to 8,000. But numbers do not tell the full devout Roman Catholic, was Jewstory. Most of the survivors are ton old or infirm to emigrate. Others strive for assimilation and do not admit their Jewish origins. There is nothing that could be called a Jew-

ish community. For reasons of guilt and public relations, the goverament finances a Jewish theater and a party-controlled Yiddish language weekly. But there is not a single bakery to produce unleavbread or a single rabhi to hold services.

This time, the campaign seems to have an equally cynical ulterior

There is no longer an effective minority, not even a tiny island within the homogenous sea. Most Poles under the age of 30 have never met a Jew. It raises a question to be pondered by sociologists, not to mention moral philosophers: Can anti-Semitism succeed without

The answer will depend upon the goal of the anti-Semitism and who is behind it. As far as can be determined, the people who made speeches at the rally about the new Zionist "threat" — and founded an or anization they called Grunwaid — beiong to the Union of Socialist Youth. Many were active in suppressing the student demonstrations in March 1968, the event that catalyzed the last purge.

Gen. Moczar Returns

Among their leaders are nationalistic rightists, including Bohdan Poreha, a film director who specializes in epics about Polish history; Ryszard Filipski, who ran a the ater in Cracow that produced anti-Semitic plays, and Ryszard Gon-tarz, a journalist reputedly connected with the Interior Ministry.

Some view the campaign as an attempt to muddy the waters and create a right wing to "balance" extremists in Solidarity. Others, reaching into history, interpret it as a sign of a factional struggle within the party, similar to the "anti-Zionist" campaign of 1968 engineered by Gen, Micczyslaw Moczar, who, significantly, is back in power in the Politburo.

More likely, it is a move to un-dercut, or at least blunt, the vast support of workers for Solidarity and to drive a wedge between Solidarity and its dissident allies. Solidarity's upper echelon includes al-most no Jews. Among the leaders most no Jews. Among the leaders of the dissident Committee for So-cial Self-Defense, KOR, are for-mer students expelled from univer-sities in 1968 because they were Jewish. They include Adam Micb-nik, a brilliant historian who was detained for three bours by the po-lice last week, and Jan Litynski, editor of the underground newsoaeditor of the underground newspa-

Jerusalem Ultra-Orthodox Jews Again Battle Police After Yeshiva Raid

New York Times Service

JERUSALEM --- In what has become almost a ritual, every Saturday afternoon bundreds of ultra-Orthodox Jews, wearing the traditional sidecurls and long black coats, walk down to Jerusalem's Ramot Road and throw stones at cars,

The conflict over driving on the Sabbath has been a point of tension between religious and nonreligious Jews for a long time. But in the last week the anger and friction have mounted to an extreme, Saturday the demonstrators numbered about 3,000, and about 600 police border patrol guards were called in to control the demonstration. After some scuffles and stonethrowing, mounted police confronted the crowd and used wa-

ter cannot to disperse them. A policeman was injured in the eye by a rock, but no arrests were reported. a police spokesman

The ultra-Orthodox Haredi community was out in unusual force to protest a tough line adopted by the police, a stance that resulted a week ago in an unprecedented police raid on a yeshiva, with considerable dam-age and, the Orthodox charge, description of the both of the state of the state of the both of the state of the both of the state of desectation of holy books.

The police contend they broke into the yeshiva, or seminary, where a service was in progress, because stones and bottles were being thrown and flares fired from the roof.

The incident followed clashes in injuries and arrests, also probetween policemen and demonvoked demonstrations by ultrastrators on the Ramot Road. Orthodox Jews in New York and London, And an anti-Zionist If such a raid "had occurred

a summit

WASHINGTON - The Reagan administration, in yet another break with the policies of its predecessor, will ask Congress this week to lift the prohibition against sales of military equipment to Argentina, informed sources said. The request to end the three-

year-old ban will coincide with the visit to the United States this week of Argentina's president-elect, Lt. Gen. Roberto Viola. He is to meet here with President Reagan and other top U.S. officials. The visit and the request to Congress indicate the administration's determination to move away from the human rights emphasis of the Carter foreign policy.

The sales ban was imposed in 1978 under an amendment sponsored by Sen. Edward M. Kennedy. D-Mass. Argentina was seek-ing then to buy about \$100 million worth of military equipment but was widely accused of human rights violations. The Reagan administration, however, has set out to downgrade the importance of buman rights in its diplomacy.

Private Criticism

In announcing the Viola visit, the State Department spokesman, William J. Dyess, said the recent "abnormality" in U.S.-Argentine relations was owing in large part to the Carter administration's outspoken position on buman rights. And he promised that future criti-

such as Argentina would be conducted in private.

The request to lift the military sales ban to Argentina is expected to go to Congress along with a more controversial tequest to lift a ban against open or covert U.S. aid to rebel forces in leftist Angola.

Earlier, the administration announced another controversial step involving a military regime in Latin America. It said it was lifting two of the sanctions imposed on Chile for its refusal to cooperate in the investigation of the role some of its former intelligence officers in the murder in Washington of Or-lando Letelier, a former Chilean diplomat.

Congressmen, Studying Reagan Tax Cut, **Dispute Effects on High, Middle Incomes** "The tax cut and the bracket By William J. Earon

ويعديهن ورزيانا أنصحف أعريه ومناري

Los Angeles Times Service WASHINGTON --- President Reagan's proposed three-year tax cut would provide virtually no major benefits to Americans who now have annual incomes between S15.000 and S35.000, according to Rep. Henry S. Reuss. D-Wis. chairman of the Joint Economic Committee of Congress. But the Reagan proposal would

reduce taxes substantially for up-per-income Americans, Rep. Reuss soid Saturday in a statement accompanying a new committee analysis of the president's tax-cut-

ting plan. His conclusion was disputed by Sen. Roger W. Jepsen, R-lowa, vice chairman of the committee, who said in a separate statement that Mr. Reagan's tax cut would be "remarkably even-handed" in its effect on middle-income and upper-income groups.

The clash centered on inflation - which tends to raise earnings and then subject them to higher taxes - and its implications for the president's proposal.

The committee study assumed a 35-percent increase in income to keep pace with 35-percent inflation over the next four years - the same inflation rate in the Reagan administration's economic as-

sumptions. "A family whose income in 1980 amounted to \$29,000 would today pay a 32-percent marginal tax rate," the committee study said. Four years from now, inflation will have raised that family's in-come to \$39,150."

Under today's tax schedule, that family would pay a maximum tax rate of 43 percent on its enlarged income. Under Reagan's program, that rate would be cut to 32 percent - the same rate the family would pay on a smaller income in

rights.

lines.

New York Times Service NEW YORK - The U.S. General Services Administration decided last December that it was time to get serious about Dial-a-Joke. It figured that employees of govern-ment agencies in New York were spending so much time ringing up Dial-s-Joke — and 25 other telephone company Dial-ft services — and that \$3,000 a month was being added to the government's local

phone bill. So the GSA asked the New York Telephone Co. to install special devices on switching terminals to make it impossible for employees to dial any of the three city-wide exchanges the company sets aside for Dial-It.

The company agreed and then delivered a punch line of its own. The hill to do the joh would be about \$100,700 more than officials of the GSA, which administers all federally owned buildings, say they were originally told.

Fair Play and Japanese Cars

The drive to limit imports of Japanese cars is heating up, and so is the rhetoric of protection. Old-fashioned jingoism has not worked: Scare stories about a Foreign Menace seem downright absurd in 1981. But sophistic appeals to the American sense of fair play may, unfortunately, accomplish what flagwaving cannot. Consider these questions:

PA -

> Other countries won't let Japanese cars in. Why must we? It's true that Toyota, Honda and Datsun have a tough time elsewhere. Italy admits only 2,000 Japanese cars a year. France informally limits the Japanese to just 3 percent of its market. Even West Germany, that bastion of free world trade, imposes a 14 percent duty on Japanese cars, compared with 3 percent in the United States.

> The appeal of such restrictions is doubly attractive at Ford, which sells almost as many cars in Europe as in the United States. But it misses the essential point. The 1.9 million Americans who bought Japanese cars last year didn't do so as a favor to the emperor but because they preferred Japanese models. The fact that European governments deny their consumers such a choice does not make it right to deny Americans the opportunity to choose.

> Japan won't let us sell enough to its people. It deserves no better treatment here. Japan certainly protects its inefficient farmers with a vengeance; one recent report estimated that the Japanese farm lobby costs its public \$15 billion a year in higher food bills. And indeed, until recently a web of protectionist rules made it difficult for U.S. manufacturers to crack the Japanese market.

> That, however, is only half the story. Next to Canada, Japan is America's largest foreign

customer, buying goods worth more than \$20 billion a year. Most of the purchases are food and raw materials that Japan needs to survive. But under pressure from Washington, the market for manufactures is gradually opening.

It is surely worth keeping up the pressure. But no one can seriously contend that curbs on Japanese cars now would serve the diplomatic cause very effectively. Besides, imposing a quota for this purpose would violate the terms of trade treaties the United States has signed.

Domestic carmakers only want three years' "running room" to catch up. What harm can be done in three years? Plenty. By conservative estimate, cutting back Japanese imports by 300,000, to 1.6 million cars a year, would permit price increases on both U.S. and Japanese cars to a total of at least \$1 billion annually, and probably more. That translates into a consumer cost of at least \$50,000 for every U.S. worker who would be re-employed.

Worse, there is no reason to believe that a three-year quota would self-destruct on schedule. Quotas on textile imports, which were imposed years ago theoretically to give the domestic industry a chance to retool, have become virtually permanent. Britain tried protecting its automakers for many years. Now, the accumulated costs of bad management and featherbedding have driven the industry to the brink. If anything, such protection seems to retard a shift to more productive manufacture. Take away the pain and the patient forgets he is ill.

THE NEW YORK TIMES.

But It's Not 1933

Sen. Howard M. Metzenbaum was going after David A. Stockman at a hearing the other day for the cuts that the administration has proposed in aid for the poor. Never a man to understate his view, the senator called Mr. Stockman cruel and inhumane. Mr. Stockman replied that slow economic growth can inflict greater suffering on the poor than any of the budget cuts that be has in mind. For poor people, he argued, the greater cruelty would be toleration of economic policy that fails to create jobs.

Mr. Stockman is quite right to emphasize the stake that everyone, and especially everyone who's poor, has in steadily rising employment. Even if you would not necessarily have chosen precisely the same welfare cuts as Mr. Stockman, the broad purpose - to make the economy grow more surely, with less inflation, by cutting taxes and budgets is an altogether rational one.

Now for a caution: The administration, and a great many other people, have been talking in the most extravagant terms about the terrible state of the economy. It is alleged to have fallen into such dire straits that its to new precepts. In this atmosphere it's easy to forget that in some respects the economy has been performing rather well. In what respects? In, above all, the creation of new iobs. Late last year, most forecasts warned of rising unemployment this winter. That hasn't happened. The unemployment rate in February. at 7.3 percent of the labor force, was substantially higher than the rate of 6.2 percent a year earlier. But there were actually more people employed last month than the winter before. The explanation is the rapid growth of the labor force. Part of it is due, as you might expect, to the high birth rates 20 years ago. Another substantial part of it results from

the strong and continuing trend among women to seek and find jobs. When the unemployment rate sticks on a plateau, it doesn't mean that no new jobs are being created. It means that jobs are being created only as fast as people are coming into the market to look for them.

Everyone would like to see them created a little faster, to bring the unemployment rate down. But it's important not to misjudge the magnitude of recent progress. Americans commonly think of the 1970s as a time of economic stagnation. Over the decade, the number of people unemployed nearly doubled, from 4 million to the present 7.8 mil-

lion — not a happy development. But in the same period, since 1970, the U.S. labor force has risen from 83 million people to 106 million. There are 19 million more jobs now than there were in 1970. That is a staggering increase - and a much larger one, incidentally, than in the booming 1960s. It's true that much has gone wrong in recent years. But the U.S. economy has continued to expand and to employ most of the people who came looking for work. It is imMANELY BETAINON THE LARGE OPPOP DE CONTRACE. WHO, ME?

effort and those others. Iraq, Pakistan, or Libya, for in a stance — three reputed candidates depend heavily on foreign aid. That means that if the local provear! or A had a h duction unit for the plutonium necessary to make the bomb is de-stroyed, it would take years to re-build the nuclear military capacity of the country.

In fact, a single air attack (pre-sumably by Iranian pilots who partially missed the target) has been enough to stop all the activi-ties of the Iraqi nuclear center near Baghdad and to prompt the depar-ture of the French technicians. The case of India is entirely dif-

ferent. A visit to the nuclear re-search center of Trombay, near Bombay, is enlightening. With its 3,000 scientists and a total 25,000 employees, this remarkable institu-tion has nothing to envy in the most advanced nuclear centers of the West. There are about a dozen nuclear research and production centers scattered around the coun-

iry. In Tarapur, a new plant for the extraction of plutonium from spent fuel rods has recently been completed. Now India can produce its own platonium on an in-dustrial scale. The new plant has been tested and the output will re-putedly exceed the forecasts. This large autonomous capacity.

achieved thanks to an advanced scientific and technological level, explains the lassitude with which, the Indian government reacts to; U.S. pressure. Washington is reluc-tant to complete a shipment to; Tarapur of 38 tons of enriched uranium approved last September, by a narrow margin (48-46) in the U.S. Senate. The United States would like the Indians to accept nuclear estemarks and internanuclear safeguards and interna-tional inspection on their territory.

Political Will

New Delhi sternly refuses and itmay be a mistake in the long run-to insist. Safeguards are a technical

The incident proved so embar-rassing to the Reagan administra-tion that the very next day, Secre-tary of State Alexander M. Haig Jr. went into an extraordinary closed session of Congress to reas-sure lawmakers that the White House was not pushing for a right-ist coup in El Salvador. At his press conference later that week, Mr. Reagan had to issue a disclaimer of his own. He said a a installmer of this own, He said a rightist coup in El Salvador "would be of the gravest concern to us," and restated the U.S. policy of supporting the current Salva-doran government against "terror-ism of the right or left."

ant for officials who n ρομέν ποι το let themselves be captured by the currently fashionable thetoric of crisis. The economy has not stopped growing. It is showing signs of malfunction, and the inflation rate is danecrously high.

Mr. Reagan likes to evoke the example of Roosevelt and the Hundred Days to indicate the scale of the changes that he wants to undertake. But there's been no crash. Even after the unpleasant surprises of 1980, with its wildly high and unstable interest rates, business has been expanding and employment has been rising again. It is a time for careful experimentation in policy. But it's not an emergency that demands immediate surgical solutions. It's not 1933.

THE WASHINGTON POST.

Cancer and the Coffee Drinker

So now it's coffee that's a possible carcinogen. Researchers at the Harvard School of Public Health have found a statistical link between drinking coffee and cancer of the pancreas, a gland that secretes digestive juices. They think coffee may cause more than half the 20,000 deaths in the United States from this lethal disease each year.

The news has upsel some coffee drinkers, A few fear mortal danger. Others feel indifferent toward this latest in a long bombardment of cancer scares. What's a coffee drinker to think?

The Harvard study ought not to be dismissed. Confused coffee-drinking laymen, ourselves among them, will best consider the evidence and look for more.

The researchers interviewed more than 1.000 hospitalized patients about their personal habits. They found to their surprise that patients with pancreatic cancer drank significantly more coffee than a control group of patients suffering from other ailments, including other cancers. The finding

gains credence from its publication in the eminent New England Journal of Medicine and from the reputation of the study team. Its leader, Dr. Brian MacMahon, is a highly respected epidemiologist who in the past bas defended industry positions on issues of public bealth. He is not an alarmist.

Whether to give up a pleasant habit in the face of such evidence is hard for nonscientists to judge. If the Harvard results are valid, coffee seems far less risky than smoking but considerably riskier than saccharin. The average American who drinks no coffee, if the Harvard results are right, has one chance in 200 of dying from pancreatic cancer.

Don't look to the experts for the best course of action. Dr. MacMahon, who once drank three or four cups daily, has given it up but won't presume to advise others. Another prominent cancer epidemiologist says be'll keep drinking coffee until the data are more conclusive. After that he may change his mind. So may we. THE NEW YORK TIMES.

Seventy-Five Years Ago March 16, 1906

WASHINGTON - President Roosevelt's publication of Maj.-Gen. Wood's report of the killing of women and children in the recent Philippines engagement with the comment: "This, of course, is entirely satisfactory," did not stifle criticism in Congress today. The subject came up in both Houses. The Senate wanted to know what provocation there had been for the extermination of nearly a thousand persons. Previous reports had said everything was quiet in Jolo. Mr. Jones, of Virginia, said that he was unable to understand how the president could endorse the killing of women and children, which had shocked the nation. It was a blot on the country that could not be condoned or excused.

A 41 4

Fifty Years Ago March 16, 1931

LONDON - Plans are being made to bring to London the finest treasures from the tomb of Tutankhamen, which were discovered by the late Lord Carnavon and Howard Carter beneath the sands of Egypt nine years ago. These treasures are to form part of a great Egyptian art exhibition, similar to the Persian Exhibition which has just closed, but far wider in scope and interest. It is boped to hold the exhibition at Burlington House, Piccadilly. Experts are busy with the problem of exporting the relics, many of them fragile with age. The scheme at present favored by the Egyptian authorities is to send the exhibits under armed escort across Europe to avoid a long sea passage.

and the second se

President Reagan has proposed

point, if not now. Each of those juntas has been guilty of some-times brutal excesses in rising to power, as the Chilean generals were in 1973 and the Bolivians last to the Congress' a comprehensive conomic program involving substantial reductions in the federal budget coupled with tax cut proposals that are together designed year, or in keeping themselves so-cure, as the Brazilians and Argento restore vitality to the nation's economy and to arrest inflation. tines have been for the last decade.

The visits by these Latin Ameri-can military delegations to Wash-Oil Company (Indiana) whole-beartedly endorses the president's program, and I am writing to urge our stockholders to express their ington are more than merely symbolic. Shorthy after the visit of the Chilean group last month, the Reagan administration lifted dipsupport for it." support for it." Then Mr. Swearingen talked about the "failures of past pro-grams" and the resulting damage to the economy, concluding that "the package President Reagan has lomatic sanctions that had been imposed against Chile when the junta refused all U.S. requests to extradite three officers suspected of plotting the 1976 murder of Chilean exile leader Orlando Letelier in Washington. Justice Department investigators who built the case against Mr. Letelier's assassins said it was the first act of terrorism ever carried out in the United States by a foreign government.

When balanced against the Reagan administration's widely beralded stance against interna-tional terrorism, the decision to cozy up again to the Chilean junta looks contradictory and even hypocritical, however sound the rea-

Diplomats, who are always good with cuphemisms, refer to the practice of saying one thing while doing another as sending mixed signals. Mr. Reagan and his advisers had best be careful about how enthusiastically they send those signals toward Latin America, however.

Whether Mr. Reagan realizes it or not, Latin America's rightist re-gimes include some brutal and unsavory characters. Like many other Latin American conservatives, their anti-Communism grows out of motives that are very different from Mr. Reagan's. Often their main interest is protecting their wealth and power against masses of poor people who'd like to share

I know a specialist on Latin American military affairs who recently returned from Guatemala telling the story of a young mili-tary commander there who, like most of his colleagues in that country's armed forces, was glad to see Mr. Reagan elected - until he saw the effect that it had on conservative Guatemalan landowners.

The young officer and other progressive young military men had been pressuring owners of large haciendas to improve the pay and living conditions of their workers. (Obviously I do not subscribe to the view that all Latin American military men are ogres.) These soldiers believe, with very incomprehensible how and

proposed must be enacted, in its entirety, in order to reverse these trends and restore confidence in our economy and in our country. 'Will of the People' "This may not happen," he warned, "unless the members of the House and Senate are reminded that Mr. Reagan's program rep-resents the will of the people. I write urge you, therefore, to promptly to your representative and to your senators to express your support for his proposals. -Letters why your editorial could call the **Pied Poetry** death sentence suspension a "fail-ure," and that such an "accommo-Pierre Leyris appears as more of

Apparently, in your eagerness for de-Maoization and your subsequent disappointment that it was not carried through in the manner of de-Stalinization, you have for-gotten that it was Mao, with Chou Ea-lai, who initiated the Ping-Pong diplomacy, which in turn resulted in the present U.S.-China "alli-. ance," as well as the "opening" of China to the outside world. REBECCA DREXLER.

Lausanne.

Originality is an essential of true poetry, for which a license is prop-

erly granted. But its abuse becomes licentiousness and mishmash.

Your editorial on Jiang Qing's suspended death sentence is

In view of the U.S. government's support and intervention on behalf of the late shah of Iran and Kim Dae Jung, to mention only two out of several infamous political leaders way ahead of Jiang Qing in is-

volved a windfall profits tax. But the courts have upheld the use of corporate funds for the expression of opinions on referenda and legislative issues, and as a bit of a First Amendment fan myself, have no desire to restrain Mr. Swearingen's freedom of expres-SICO

Almost daily, The Washington Post and other newspapers have their advertising revenues in-creased by full-page ads in which one corporation or another is telling Congress to quit dallying and pass the Reagan program. Because the Post pays my salary, I think for not entirely unselfish reasons that it's a wonderful way to spend advertising dollars.

But if one has any sense of U.S. history, one has to believe that both the corporations and the president whose program they are so enthusiastically promoting are on somewhat shaky ground.

Ronald Reagan came to the White House probably less behol-den to big business than any other Republican president in this centu-w Big hypersection of the sector ry. Big busmessmen came rather late to his cause, only after their original heartthrob, John B. Con-naily, had demonstrated he had less appeal in the polls than in the

have been embraced so passionately by corporate America that there is an abnost automatic suspicion that the Reagan program may have been designed with big business in mind. One has to wonder how helpful

that will be to Mr. Reagan in the long run. Americans have learned to view skeptically the promises of big government, but that does not mean they are prepared automati-cally to accept political instruction from big business.

There is also a bit of a risk for susiness in this arrangement. Mr. Reagan's supply-side economics is a theory of uncertain validity. If its promise of abundance proves empty, and produces only higher un-employment, deficits and inflation, then the adverse reaction could engulf not just Mr. Reagan and the Republicans but the business institutions which asserted that "the future of our nation" requires that the program be enacted "in its entirety

But it may be that Mr. Swearingen is simply trying to revive the tradition of public persuasion that has been part of Standard Oil's history since the days when that fabled public relations man, Ivy Lee, undertook to improve the image of its Rockefeller lounders.

In the biography of the Rocke-fellers by Peter Collicr and David Horowitz, Mr. Lee — the ex-newspaperman who among other things suggested that John D. dramatize his philanthropies by handing ont dimes — is quoted as telling a group of executives: "Crowds are led by symbols and phrases. Success in dealing with crowds ... rests upon the art of getting be-lieved in. We know that Henry VIII by his obsequious deference to the forms of the law was able to get the people to believe in him so completely that he was able to do almost anything with them." Perhaps the latter-day Standard Oil executives believe the same

vernment regulation of business device that would be ineffective against the political will of a sciennifically advanced country to go nuclear. The Indian problem is political. There is an overwhelming consensus on this point among Eu-ropean diplomats in New Delhi. The Indians dismiss the danger

for their country of a Pakistan atom bomb, although they point-edly mention reliable reports of a unnel being prepared in the area of Cholistan for a likely Pakistani underground test. They are fearful of China in-

stead. The easy occupation of Ti-bet by the Chinese Army has shown the weakness of Indian conventional forces. But China is not yet a large nuclear military power and the Indians, as seen, have such a scientific and technological background that they can to some ex-tent match the Chinese nuclear military program. Only a joint effort by the United

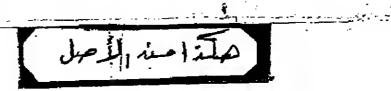

States and the Soviet Union is likely to deter the Indians from acquiring nuclear military status. Only these two powers can provide a credible guarantee against China (and with it, test New Delhi's real

motivations). If there is a U.S.-Soviet summit in the near future to review major problems of international order, it should be recalled that for the last 20 years nuclear nonproliferation has had high priority in both Washington and Moscow. ©1981, International Herald Tribune.

Chinese Advised to 'Button Up' When Meeting Foreign Visitors

United Press Internationa

PEKING --- The official Workers Daily has cautioned Chinese citizens who deal with foreigners to mind their manners and not leave their pants unbuttoned, eat with a knife or laugh when someone has an accident.

The column on "Things to Bear in Mind When Meeting Foreign Gnests" was published as part of China's current campaign to promote good manners and broaden relations with foreign countries. The column apparently was meant for Chinese whose jnbs require meeting foreigners, since authorities actually discourage personal contacts between the public and visitors. Perhaps the most important piece of advice was, "when chatting

with foreign guests, avoid political arguments at all costs." The principal guideline given by the newspaper for Chinese contacts with foreigners is to be neither subservient nor chauvinistic. It also pointed out "some words and behavior which we don't mind so much may appear rude or overly humble to foreigners."

"For example, don't ask people [especially female guests] how old they are, don't ask how much they earn, don't casually ask what is the price of their clothing and belongings." Other admonitions: do not talk too inudly; do not shout greet-

ings from afar; "when you see somebody falling down or having other accidents, you should immediately go forward and belp. Never stand aside and laugh; after you have been to the wash-room, properly secure your belt and huttnn up your pants before you come out."

Thai Communists were also having trouble adjusting to the new party line as China moved closer to the United States and sought to improve relations with the Thai government - for years the Thai party's two favorite villains.

"This was simply too much for us to swallow," a recent defector said. "Much as we detested the authoritarian ways of the Bangkok government, the totalitarian ways of the Communists were worse."

The universal complaint among defectors is that the Thai Communist Party is more Chinese than Thai, "We wanted Socialism, Thai style, while the party leaders blind-ly followed the Chinese model," a former student activist said.

Pupils in China To Study Morals The Associated Press

PEKING - China's primary schools have been told to begin new courses to teach children to love the Communist Party, serve the people and live frugally, the Chinese news agency has reported.

The instruction came amid reports in the afficial press about dnubts among young people re-garding the superiority of Socialism and leadership by the Communist Party. The agency said Saturday that the Ministry of Education has instructed all primary schools to introduce ideological and moral

teaching this fall. Moral teaching should be done in a lively way, through positive examples, to suit young children, the ministry's circular said. It said primary schools should emphasize the "lofty ideals of Communism and hard study to realize China's modernization.

FLORENCE - Ending a two-

production of synthetic liquid fuels based on the coals of the Kansk-Achinsk Basin." The Kansk-Achinsk Basin, in southern Siberia, is a vast repository of a low-grade type of coal known as lignite, similar to huge lignite deposits in the western United States. Although overall reserves are estimated by the Rus-

sians at 140 billion tons, the basin contributes less than 1 percent of the nation's coal production. The lignite disintegrates while being transported; it tends to selfignite in summer and a high moisture content causes it to freeze in winter. The main options for large-

scale use of Kansk-Achinsk lignite are use at mine-site power plants or conversion to synthetic fuels. Later in the party congress, Pre-mier Nikolai A. Tikhonov, in discussing the new economic development plan, said the synthetic fuels

would bring chaos. Both were right, he said. He is staking out the farthest right position of all the candidates, calling for a return to the gold standard, cuts in business taxes and a stiffer foreign policy. Taking a swipe at Mr. Giscard d'Estang's balanced emphasis on Police in India Kill 1

WANT TO BECOME A MILLIONAIRE NOW AT A 10% DISCOUNT?

Your winning ticket in the North-West German State Lottery costs at least 10% least because dollar and pound sterling have risen in value against the DM.

This government-controlled West German lottery has a maximum Jack-Pot of 2 million DM waiting for the lucky winner.

Only 300,000 tickets numbered from I to 300,000 participate in drawings starting on April 3 and lasting until September 25, 1981. 113.462 numbers will win one of these prizes:

1 x 2 million DM (Jack Pot) 2x1 million DM 17 x 1 million DM (or 170 x 100,000 DM) 35 x 100,000 DM and over 113,000 other prizes ranging from 240 DM to 50,000 DM.

You could lose, of course, but 1 out of every 3 tickets will win a prize!

Here's all you have to do:

Order your ticket with the coupon below. Payment may be made after you receive your ticket and invoice. You may also pay in advance: personal check, traveller's check, bank transfer, international postal order, or cash by registered air mail,

As soon as we receive your order, we will send you your lottery ticket, the official drawing schedule and the lottery rules.

After each drawing, we notify the winners immediately. Your prize will be said to you by check or to any bank you desire. There are no German taxes or other deductions.

At the end of each drawing, you will receive within a few days the official list of winning numbers and your ticket for the next drawing.

Your lottery collector is strictly forbidden to give any information to any person or institution about participants or how much they win. In other words, when you win, only you and we know about it: no curious relatives, charities or anyone else need ever know you won. It remains a secret between us

Director Rene Clair Dies in Paris at 82

New York Times Service PARIS - Rene Clair, 82, the first person ever to be elected to the French Academy solely for his film work, died at his home here Sunday.

Page 6

Pr

Mr. Clair's career covered 42 years and 28 films. During World War II, he worked in England and the United States where, among

OBITUARIES

other films, he directed "I Married a Witch," starring Frederic March and Veronica Lake, "The Ghost Goes West," and "It Happened Tomorrow

In 1965, 20 years after his return to France from the United States, an interviewer asked him if he was at all nostalgic about his Holly-wood years. "Absolutely not," be replied. "But the years here in France — oh yes!" Th most film critics, those years are still considered to have been his most productive.

In 1930, he directed "Under the Roofs of Paris," his first worldwide hit in sound. The next year, he did "Le Million," which many French critics consider his finest film. In 1932, he directed "A Nous. la Liberte', which has long impressed American critics.

Mr. Clair was born Rene Cho-mette on November 11, 1898, near the old Les Halles food market in the bustling center of Paris. His parents were middle-class mer-chants.

He attended schools in Paris. spent six months driving an ambu-lance in World War I, then embarked on a career as a journalist on the paper L'Intransigeant. "Above all," he said in an interview when he was 80, "I wanted to he a poet or a novelist."

He also tried acting, and it was during his brief career before the camera that he took the name Rene Clair. In the early 1920s, he met the director Jacques de Baroncelli, who convinced him to move behind the lens. In 1923, the first flirted with the Dadaists and surrealism and, in 1924, with the painter Picabia and the composer Eric Satie, put together a short, surreal-

istic film called "Entracte." This was followed by "The Phantom of Moulin Rouge," "The Italian Straw Hat" and "The Imaginary Voyage." In each film, Mr. Clair provided his own scenarany year since 1954. io, which led an early critic to coin a new word to describe him: "cinecrivain." or film writer.

When he moved into sound, his films of 1930-1932 insured his in-

berte" was the inspiration for Chaplin's Modern Times, he replied: "If he copied me, it is an honor for me. He is the most talented of all the comic film writers; he is the master of us all."

He returned to France in 1945. His first postwar film, made the next year, was "Silence is Golden," an old-fashioned sentimental comedy starring Manrice Chevalier. It was followed by, among other films, "Les Belles de Nuit" (1953); "Les Grands Manoevres" (1955), with Brigitte Bardot, his first color film; and his last picture, "Les Fetes Galantes" (1956).

Mr. Clair was honored as one of the grand old men of the French ma - he was inducted into the French Academy in 1962 - but he never regained his prewar stature. His world of fantasy and poignant ntimentality was swept away by the "New Wave" of young French directors such as Francois Truf-

and the second
NEW YORK — A group of unlikely joggers — pigs — took to a grassy track at Arizona State University in Tempe last April to help two researchers study the effects of jogging and diet on health. For the joggers, the sport ended before the summer was out. They were sacrificed to science, and the two researchers -Ross Consaul, a graduate student, and Dr. George Seperich, an assistant professor in the university's food quality program began the tedious job of examining the study results.

Samples of blood, muscle, fat and other tissue are still being analyzed from 18 pigs that began jogging as piglets. 18 that took to the sport later in life and 18 that led more piglike lives entirely sedentary.

The early findings suggest that a balanced diet may be more important than exercise in determining good health. Dr. seperich said. Sedentary pigs on a balanced diet accumulated less fat that in joggers on a high fat diet. The joggers, he said. "apparently just adjusted their input to match their caloric output."

The study, which is to be completed next month, has also established that pigs are excellent stand-ins for humans. Dr. Seperich said. Their digestive and circulatory systems are so similar to the human, he noted, that when samples containing hipoprotein components from the blood of some pigs were sent to a local hospital for analysis, the hospital was fooled. "They ran the samples," Dr. Seperich said, "and sent back word to us that they thought these athletes were in great condition."

U.S. Metals Stockpiling Revives Debate on Aid to Mining Firms

By Jerry Knight

and Peter Behr

Washington Post Service WASHINGTON - Backed by conservative artilry, the Reagan administration has begun a camign to end U.S. dependence on foreign supplies of small group of metals and minerals.

On Friday, President Reagan announced a gov-inment plan to purchase \$100 million in strategic inerals to build up defense stockpiles, calling it the st step in a program to "decrease this nation's daerability." Reagan administration officials led by Interior

scretary James Watt are determined to open wilmess areas and other federal lands to exploration d production of minerals. The minerals issue dicies new policies toward the mineral-rich countries. southern Africa and a helping hand for the U.S. And it caused the abrupt dismissal March 8 of the

And it caused the astroph distingent balance is a start of the U.S. delegation to the United Nations Law of the Sea conference because the Reagan administran feared the conference treaty could jeopardize ep-sea mining of minerals by U.S. companies.

Expectations of a complete change in policy are ing hold. The prospect of a minerals boom has 1 three of the nation's giant oil companies to in-st billions in nonfuel mineral resources. Many forer "gold bugs" now are touting manganese, titani-p and molybdenum. One of Wall Street's biggest "ms, Bache Halsey Stuart Shields, this month ben selling exotic metals to investors - evidence of new, speculative fancy.

'Not Vulnerable'

A rear guard of environmentalists and some reince experts say the fears of critical mineral short-, es are exaggerated. "We are dependent, but we en't vulnerable if we have ways of getting these merals from somewhere else and stockpiling em," said Hans Landsberg, a minerals expert at sources for the Future, a Washington research or-. nization. Stable countries such as Australia, Cana-, Mexico, Brazil and Venezuela are important exsters of many strategic minerals, he noted

One potential exception is cobalt. In their view of troubled world, key Reagan administration offials see the prime sources of vital minerals such as is in hostile or vulnerable bands,

"The United States is now dependent on foreign urces for 100 percent of our manganese and 100 reent of our cobait," Mr. Watt said recently. The ief source of these metals includes the Soviet Un-1, South Africa, Zaire, Zimbabwe and Tanzania. According to Secretary of State Alexander M.

- ig Jr., the efforts by the Soviet Union to extend influence in Africa are the beginning rounds of a source war" aimed at the United States and its justrial allies. He made that assessment last Sepuber in testimony before the House Mines and ining subcommittee as president of United Tech-logies, the nation's third largest defense contracand a major user of cobalt.

The nation's current cobalt stockpile - 40.8 miln pounds — is only half the necessary amount, d a cutoff of that mineral would reduce United. Technology's output by 25 percent within a year Mr. Haig said.

The stockpiling program announced Friday will begin with the purchase of 1.2 million pounds of cobalt at about \$25 a pound.

Other materials that are being considered for the stockpiling program are manganese, bauxite and aluminum oxide, platinum metals, vanadium and nickel. The United States currently imports more than 75 percent of its requirement of each of these materials.

Stockpile purchases will be financed by sales of surplus supplies of other government-held materials, including silver and tin.

But Mr. Watt said he is oot content with that. He has taken on the responsibility to "foster and en-courage" the U.S. minerals industry. In recent congressional testimony, be said he sees himself as a "friend" of the industry, "not as a representative of private mining interests, per se, but as a spokesman for the very real public interest involved in the protection and preservation of a strong minerals sec-1100.'

Mr. Watt said he is considering a new policy "per-mitting exploration for and development of minerals within the wilderness system. The best answer to minerals availability is domestic production," - not

stockpiling, Mr. Landsberg said that with careful attention, an adequate minerals stockpile capable of lasting six months to a year can be built up:

He discounted the worries about a possible mineral cartel forming to limit supplies and raise prices. The stable mineral exporting countries would not do that, and the vulnerable African countries are "liv-ing hand-to-mouth" and can't do without the income from mineral exports, he said.

The prospects for extensive domestic production "are not very good," he added. "We have done it before," he said, "and every time we try to push domestic production, the costs are very high. The question is, do you want to load up the American economy with costly minerals if you can get them from somewhere else, for less."

Not surprisingly, Mr. Watt's strategy alarms environmentalists.

"It's a myth that public lands aren't open to mineral exploration," said Brock Evans, associate execu-ove director of the Sierra Club. "Only 80 million of 760 million acres of public lands are totally closed — primarily national parks, Defense Department reservations and lands set aside for particular uses, such as oil shale mining or reservoirs.

Environmentalists don't object to tapping public lands "when the national security is truly at stake and not just the profits of the mining companies," said Mr. Evans. Boundries of the River of No Return Wilderness in Idaho were redrawn at the urging of mining interests to exclude a potential cobalt mine, he noted. Owners of the mine recently an-nounced they had decided not to open the mine because it was cheaper to import cobalt from Africa. The debate is "fundamentally ideological," Mr. The debate is "fundamentally ideological," Mr. Evans said. "The mining people are far more rabid than anybody else about the issue of public lands. The just can't stand to see land sitting there not being used. They'll use any argument" to justify opening up public lands.

how no capital gain.

ECU

this company, stop its financial bemorrhaging and move toward growth and profits," said Didier Pineau-Valencienne, the 50-year-old, Harvard-educated French executive who will lead the modernization and expansion of the 40 billion French franc-a-year (\$\$ billion) company. Mr. Pineau-Valencienne, who was described by an admiring banker last week as "one of the best and brightest among France's new breed of very tough, technocratic managers," was named to head the secretive, hidebound

est private banking group. For an undisclosed amount, the Paribas group, Compagnic Financiere de Paris et des Pays Bas, became the largest single shareholder, with 35 percent, in the Empain family bold-ing company, which controls both Empain-Schneider and Electrorail, a Belgian bolding company with controlling interests in Belgian banks and glass manufacturing, transportation

Empain's New Chief Plans Radical Changes

By Axel Krause onal Herald Tribum

PARIS - The new chairman of France's Empain-Schneider group believes major surgery is necessary to restore the industrial conglomerate to bealth.

"I want to change the feudal atmosphere in

French-Belgian conglomerate as part of the takeover announced Feb. 26 by France's larg-

and engineering conpanies. Mr. Pineau-Valencienne and Paribas stra-

tegists are examining or planning a series of

major industrial and financial moves affecting Empain-Schneider.

حكدًا من الأصل

BUSINESS/FINANCE

The first move, which has been under study for well over a year and is expected to be an-nounced here Wednesday, involves the merging of several specialty steel companies controlled by Empain-Schneider's metallurgicalengineering affiliate Creusor Loire, with those of Usinor. France's leading steel company. Almost all of them are money losers and heavily in debt.

The French government, which is backing the merger, is to provide low-interest loans to-taling at least 400 million frances to finance modernization of the merged plants, authoritative sources said Friday.

"Steel is among our sectors in bad shape ... The merging of our interests should belp end the hemorrhaging." Mr. Pineau-Valencienne said. He added that other moves being contemplated include the sale of subsidiar quired in recent years, primarily in the fields of real estate and shipbuilding, as part of what he termed "housecleaning - a very immediate problem."

Empain Schneider lost "considerable" amounts of moncy during 1980 on sales of roughly 40 billion francs. Mr. Pineau-Valencienne said it still was too early to predict when the company would hegin generating what be termed "essential, growing cash flow." During 1979, the latest period for which fig-

ures are available, the group reported a net profit of 47.9 million francs on sales of 35 hillion francs.

Mr. Pineau-Valencienne will be writing the latest chapter in the history of Empain-Schneider, which for decades has been one of France's biggest builders and exporters of heavy industrial equipment, including turnkey petrochemical plants and nuclear reactors.

War Production

Since its founding in 1836, the company's growth has been interwoven with the nation's overall industrial strategy, which during World War 1 and World War 1t involved producing everything from armaments to locomotives for the government.

During the early 1960s, clashes erupted between the Empain family and Charles De Gaulte and one of his financial advisers, Valery Giscard d'Estaing, over a 25 percent shareholding the Belgian group bad purchased in Schneider, a company that until then had been completely French.

According to interviews last week with those involved, the latest changes are the result of the circumstances surrounding the relinquishing of control by the man who since 1967 beaded the company - Baron Edouard-Jean Empain. His resignation as chairman and chief

Westinghouse Sees Rosy Future; Critics Not So Sure

By Barnaby J. Feder

Didier Pineau-Valencienne

"very immediate problem"

New York Times Service NEW YORK - Over the past decade. Westinghouse Electric has demonstrated that it is among the best of the nation's industrial beavyweights when it comes to ab-sorbing a punch. But can it throw one?

The Pittsburgh-based giant was wounded

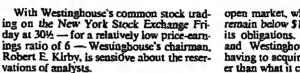

several times in the 1970s by a series of costly and time-consuming events.

Westinghouse not only survived, it emerged last year with most of its legal entanglements settled. Its newly slimmed-down operations generated record sales of \$8.5

billion and record profits of \$402.9 million. It also amassed a borde of cash that enabled it to offer \$646 million for Teleprompter, the nation's largest cable television concern.

Still, analysts today are more impressed with the company's past resiliancy than with its prospects for the future. Many of its products face well-entrenched competitors and others have questionable growth pros-

"It is a turnaround situation that has

Dishelie

"People don'i believe Westinghouse can really deliver," said Kemp Fuller, an analyst at Moseley, Hallgarten, Estabrook & Weeden who has been among the most resolute boosters of the company in recent years. Part of the problem appears to be that many of the company's difficulces during the past decade were either caused or exacerbated by its own miscalculatons.

Doubters of the company's abilities point to the sale in 1974 of the company's large but ailing appliance business to White Consolidated Industries, which promptly re-turned it to profitability. They also mention a \$300,000 fine assessed to the company af-ter it pleaded guilty in 1978 to bribing Egypt's Deputy Prime Minister Ahmed Sul-

But the real blow, they say, was the com-pany's miscalculation of the uranium market following the Arab oil embargo of 1973. To help market its ouclear-powered electric generating plants, Westinghouse had guar-anteed delivery of uranium to utility customers at an average of \$9.50 a pound into the 1990s. It counted on purchases in the

remain below \$10 a pound, to cover most of its obligations. Instead, prices skyrocketed and Westinghouse faced the prospect of having to acquire uranium at prices far higher than what it could charge on resale. Suite Filed

In September 1975, Westinghouse charged that the price increases bad been engineered by an illegal cartel of uranium

producers. For that reason, Westinghouse claimed, it was not obligated to fulfill its cootracts. As expected, the utilities sued Westinghouse, and Westinghouse sued members of the alleged cartel,

Westinghouse's move infuriated its customers but proved to be financially adroit. All but one of the suits against the company are settled, at a cost far below the outlay that would have been necessary to fulfill the contracts. And, with the liabilities already written off against earnings in the last few years, the enmpany now is beginning to pile up money from settlements in the suit it brought against members of the alleged car-

Modernization

The current situation has heartened believers in the company, who say that the weaknesses cited by analysts have been overblown and that the changes in the company's structure and management since Mr.

R

1

1

Kirby became chairman in 1975 make it less likely that they will recur.

They point to the modernization of the company's strategic planning process after the appointment in 1976 of Donald V. Povejsil as vice president for corporate plan-ning. Under Mr. Povejsil, who had been Wesunghouse's vice president for personnel. planning was separated from the annual budgeting process

As part of the new emphasis on planning, the company has renewed attention to its international marketing efforts. In 1979, a new international company was set up un-der John C. Marous Jr., the former executive vice president for construction, to coordinate the overseas efforts.

The acquisition of Teleprompter was seen as part of the new emphasis on planning. The cable television industry is seen as a natural area of expansion for Westinghouse's broadcasting business.

But if there is a higher god in the Westing-house pantheon these days than new technology, it is productivity improvement. Last August, the company announced that L. Jerry Hudspeth, a plant manager in Georgia, would become its vice president in charge of productivity. It has created 500 Japanesestyle quality circles, in which groups of employees are trained in problem solving and encouraged to make suggestions for improving producovity.

turned." Robert McCoy, an analyst at Kidd-er Peabody, said. "Now they really have their work cut out for them."

Decline in Interest Rates Buoys Market

With Westinghouse's common stock tradopen market, where prices were expected to

By Carl Gewirtz onal Harald Tribune

New York moved up late Friday in wake of the unexpectedly large \$3.2-billion increase reported in the basic money supply, most ana-lysts remained convinced that the rise was not serious enough to cause the Fed to alter its present direction. The growth of all measures of the money supply remain either within or below the Fed's stated target and, equally important, the demand for credit is flat. A wide number of analysis ex-

EUROBONDS

on seasoned five-year dollar issues pect short-term rates to continue closed the week at 13.9 percent, easing and even the two most pro-nounced pessimists, Henry Kauf-man of Salomon Brothers and Al down from 14.2 percent a week carlier while on 15-year issues the average yield fell to 13.8 from Wojnilower of First Boston, have 14.03 percent. stated that they expect rates to de-cline, 'Messrs, Kaufman and Market sentiment was also buoyed by the successful placement of two new issues.

Wojnilower part company from the crowd in their belief that later this year rates will soar to new highs whereas most others expect a "tap" continued easing. For investment bankers, the eas-

ing in short-term rates signals the re-opening of the bond market. Whether this is just another "window" which ultimately comes slamming down depends not only on the future direction of shortterm rates but also on the discretion of bankers. The Eurobond market has suf-

fered greatly from bankers bring-

time and too often priced to anticidetermined by existing conditions. If rates decline, subsequent porpate further decreases in rates rather than pitched to appeal to tions of the issue can be sold at higher prices. Swiss Bank Corp. investors As a result, new issues have carried wrong coupons and considered this a better strategy have dropped to steep discounts, than putting a higher coupon on burning investors who bought the issue now and latter face selling paper at a premium - a recogthem as well as underwriters who have been unable to sell them. nition that there is always resistance to selling paper at more than Prices Un its face value Canadian Imperial Bank of Commerce sold \$185 million of Prices in the secondary market have picked up, gaining up to 114 points last week for short-dated is-

three-year notes bearing a coupon sues and up to 1% points on longof 14½ percent. These were also er-term issues. According to White well received as a 1/2 percent un-Weld Securities, the average yield derwriting fce and a ½ percent selling concession make the paper very attractive for banks to hold in ar own portfolios.

Scheduled to be announced this week is a \$50-million five-year issue for American Airlines carrying warrants to purchase an additional \$50 million of seven-year notes. These will be equipment trust cer-tificates, collateralized by jet an-The Australian Resources Decraft. American Airlines itself is relopment Bank announced a rated triple-B. The coupon is exissue of \$60 million of five year notes bearing a coupon of 13 percent. An initial \$30 million was pected to be 151/2 percent and pricing on the five-year notes will be set at the end of the offering peri-od. The warrants will be good for sold last week at a price of 95% for a yield to maturity of 14% percent

nine months. in line with the 14% percent being offered on five-year Euro-dollar deposits considering that Although the market was rife with rumors of more issues to come, the only other deal sched-uled for this week is a \$150-mildeposits are not tradeable and can lion, t0-year floating rate note for Mexico's Pemex. It will offer a

For the first time ever, WORLDTRADE introduces the comprehensive directory of the Arab business world. Designed for both Arab buiness executives and their international counterparts, WORLD-TRADE serves both as a guide to one of the world's most important regions and as an indispensible communications tool.

Carefully compiled and organized for quick reference, the Arab Edi-tion of WORLDTRADE, the international Business Directory contains over 250,000 listings and extensive information on over 25,000 companies based in 21 Arab countries.

But WORLDTRADE's Arab Edition is more than a directory listing the leaders, telephone and telex numbers of Arab businesses. It is an essential aid to efficient and productive communications, travel, trade, traditions, customs and background of every Arab nation. It is a "must" for your office.

Listed below are the contents of this landmark publication. Better than anything else that can be said, they demonstrate that WORLD-TRADE's Arab Edition is more than a useful reference book ... it is an essential investment for the competitive business with interests in he Middle East and Northern Africa.

f you conduct business in the Arab world, WORLDTRADE's Arab Edition is a natural resource for your office. It also provides the single most efficient advertising vehicle for reaching businesses throughout he Middle East and Northern Africa.

The Arab World - by countries: a guide to over 25,000 businesses from 21 Arab countries.

The Arab World - by cities: an additional reference aid - business headquarters and branch offices listed alphabetically by city and country, also mentioning major activities.

The Arab World - by telex numbers: cootains all telex numbers in use . throughout the Arab countries in numerical order, with company names, addresses and answerback codes.

The Arab World - by activities:

the most comprehensive classified trade directory of the Arab World, covering over 50,000 listings under 2,000 trade categories.

The Arab World - by agencies: the who represents whom in the Arab world, a guide to agencies, outlets and representatives for over 4,000 major foreign companies in the Middle East and Northern Africa. The Arab World - hotels: every major hotel in the Arab World - alphabetically by countries.

The Arab World - banks: every bank in the Arab World with respective branches.

1

Worldmap: a world atlas by continents and major political as well as industrial areas.

Worldtime: a guide to the world's time zones for better communication

Worldholidays: a calendar of public and religious holidays in the industrial world.

Worldfairs: a calendar of fairs and exhibitions worldwide. Worldfacts: a businessman's mini-encyclopedia of vital statistics covering every important aspect of the countries of the Arab World. Worldcodes: important abbreviations used in international communication

Worldlanguages: a concise dictionary of often used Arab phrases.

Over 250,000 listings!

If you recognize the potential value that WORLDTRADE has for you and your firm, contact;

Banks Say Hungary Loan lot Destined for Poland

By Carl Gewirtz mai Herald Tribum

ARIS - Bankers organizing : current Euromarket loan for ingary adamantly rejected gestions last week that the option, starting at \$400 million, ght be funneled to Poland to ip that East-bloc nation through current foreign debt crisis.

The bankers argued that Bulgars prepayment of two earlier Eumarket loans offers the most tell-I proof that there is no move tot to have credit-worthy Eastx countries raise money for Poid. If this were so, they said, Bulria would not be prepaying its

Bulgaria, regarded as the East ropean state most closely allied the Soviet Union, last month spaid a \$100-million six-year in taken out in 1977 and last ek gave notice that it will pay another \$125-million loan, also anged in 1977. Bulgaria is reried to have told bankers that it) a substantial current-account plus last year and therefore es not need the borrowed funds. The bankers also argue that mgary's borrowing fits its own eds. The Hungarians are reportto have advised the banks that vill need some \$600-to-\$650 mil-

tion this year to pay off maturing debt. It also estimates that it will Aanster Bresser Franki Landor Milan New Y Paris Zavict run a current-account surplus of about \$150 million this year. Thus, the current \$400-million loan, coupled with the just com-

pleted \$150-million loan syndicat-SYNDICATED

LOANS ed among Mideast institutions and the anticipated current-account surplus will cover its estimated forcign currency needs for the year. Bankers say that the Hungarians have said that they will not need to return to the syndicated loan mar-

ket this year. Comanagers Sought

Citibank, organizer of the current seven-year loan, has four comanagers lined np — Bankers Trust, Lloyds Bank, Deutsche Bank and Bank of Tokyo -- and is looking for another three to complete the lead management group. Bankers will have the one-time option of setting the interest on the loan at either % point over the

Fussians Deny Report on Oil Find

TYUMEN, West Siberia - An unexploited oil field in West Siberia probably contains large reserves but not the quantities, reported in December by a Swedish research firm, according to Soviet oil officials.

They denied the report by Petrostudies that the discovery was farge enough to double the world's recoverable reserves of oil. Soviet officials said it was based on a misunderstanding of Soviet

The officials told western correspondents that the field, named Sahmskoye, was big and probably gigantic.

But they declined to give figures on its reserves and said high inderground temperatures and pressures made its oil difficult to extract and that production of significant quantities was unlikely before 1985.

This was the first official Soviet denial of the Petrostudies report that the field could contain 4.5 trillion barrels of oil.

Officials had previously expressed scepticism over the report, which indicated the field had seven times the proven reserves of Saudi Arabia.

Yevgeny Yevreemov, a deputy director of West Siberia's Oil Scientific Research Institute, said the mistake had arisen because of a misunderstanding of Soviet terminology.

He said Soviet geologists had estimated overall hydrocarbons in the Salimskoye field, including hydrocarbons that were not fluid.

 Revidento 1.48 Remits R By George Versey New York Times Service PORT WASHINGTON, N.Y. school senior, which normally sat her killer tendencies on the court. isfies her between tournaments. "I had to go on the road again." It was always easy for Tracy Aus-tin. She would hop out of bed eve-ry morning and go play tennis as long as she needed, as long as she wanted. Then, two montes ago, she felt a pain she says. "Even if I couldn't play. I had to go somewhere." With all the options of a young champion, Austin chose her other home. Since she was 10, whenever her travels took her near New she felt a pain. "It was so deep, we thought it was a pulled hamstring, so I did stretching exercises for a bam-string muscle." Austin recalls. York, she has stayed with Dick and Madeleine Zausner of the Port Washington Tennis Academy. Last week she picked up the phone and said she wanted to come East. "But then we found out it wasn't the hamstring at all." The source of pain is now diag-nosed as an inflamed sciatic nerve that runs from the lower back into The academy has been a major tennis center since Harry Hopman. the legendary Australian coach. spent several years there in the mid-'70s. The Zausner family, which directs the nonprofit acadethe backs of her thighs. At the age of 18, she has her first injury as a my, welcomes touring pros who professional — serious enough to keep her off the tour the last two want to work out. Austin relies on the Zausners for months, serious enough to make more than a tune-up. They are surher say she will not compete in the

Navratilova Reaches Final

DALLAS (AP) — Top seed Martina Navratilova rallied from 2-5 down in the final set to beat Virginia Ruzici, 6-0, 4-6, 7-5, Sai-urday night in a semifinal at the Dalla discussion and the Avan Dallas championships of the Avon circuit.

Navratilova was to play her dou-bles partner, No. 3 seed Pam Shriver, in Sunday's final for a \$40,000 first prize. Shriver beat un-serviced Benting Partner 5.4.4.6 for seeded Bettina Bunge, 7-6, 4-6, 6-1.

	25. and perhaps serious enough to keep her off the courts indefinitely. "It is so frustrating to realize I can't just get up and run," she says, "My body is restricting me. It's starting to make me realize how much I love playing tennis. But right now it's just depressing." Himing the Road The frustration became so great a unch i see that the could not stav	with her. She used to move up two years in ler competition — at r tournaments held wear at the academy, wearing braces, and illover sweater rather rersized, frilly tennis never quite disguised re Sports Page 13	unte beheve she would not bounce baek fast. After a few scare headlines that aid her career was in jeopardy "It's never entered my mind"1. Austin began pointing toward a ournament in Seattle two weeks go. She worked out two and a half hours one day and three hours he next, and "the pain came right back." It was "not as had as be- ore," she says, "but it was there."	Connors Wins in Brussels BRUSSELS (Reuters) — Jimmy Connors won the Belgian indoor temis championship Sunday with a 6-2, 6-4, 6-3 victory over Brian Gottfried. Vilas Takes Egyptian Open CAIRO (UPI) — Guillermo Vi- las of Argentina defeated Peter Elter of West Germany, 6-2, 6-3, Sunday to win the \$15,000 first prize in the Egyptian Open tennis championship.

WHITE SUPREMACY A Comparative Study in American and South African H By George M. Fredrickson, Oxford, 350 pp. \$19.95. Reviewed by Jim Hoagland

A N American arriving in South Africa is immediately and repeatedly told by his hosts the one thing that he would discover alone. For all of their obvious similarities, racial and otherwise, the United States and South Africa are two very different societies, shaped by histori-cal experiences separate and unequal. George M. Fredrickson has written a valuable and in places brilliant book that does much to tell us how those differences developed, why they are important and ultimately why one's South African hosts should take neither comfort nor refuge in those differences.

Historical siblings, the United States and South Africa are also historical alternatives, different roads taken by European settler societies expanding into new continents where they both needed the ideology of white supremacy to explain and justify their conquests. Fredrickson has made the centuries-long shaping of Jim Crow and of apartheid the subject of this innovative comparative study, which defily picks apart the tangled threads of two brands of white power and traces them back to their sources.

South Africa is an America that was unable to kill off the indigenous peoples the white settlers confronted, an America in which slavery played no great economic role and quickly vanished, an America in which indus trialization did not begin until after World War II. As a result, South Afri-ca has had to defer dealing with its "native problem" until late in the 20th century at a time when the world's standards have dramatically - and in the South African viewpoint unfairly - changed on that score, trapping South Africa's white nation in a time warp.

Fredrickson, professor of American history at Northwestern University, skillfully cuts back and forth between the experiences of the two countries as he stresses the continuous and mutable interaction of economic exploitauon, demographic pressures, cumula-tive national character, sexual anxieties and other factors that forged in each nation a psychology of white domination and black degradation that would serve "to bind together the white population, or some segment of it, to create a sense of community or solidarity that could become a way of life." Slavery was tried in the United States and South Africa not only for apparent economic advantages but also because it seemed to hold out "the promise of a more stable and cohesive social order" among white set-tlers that colonial authorities found

increasingly difficult to control. The Dutch burghers who waded ashore at the southern tip of Africa in the mid-17th century at about the same time that English settlers were heading for America certainly did have a different way of life in mind. The English were driven by percep-tions of overcrowding at home and the national experience of already having fought a war of colonization in subduing Celtic Ireland a century carlier. They were once again intent on recreating self-sufficient communities that would of necessity displace the indigenous tribes.

The Dutch hoped to establiing more at the Cape of Goc than a trading station that w plenish ships with produce an obtained from the indigenous tribes of the area. "Overrid other considerations, includir of religion, was the economic of a large capitalistic enterpri more than middlemen to worl Fredrickson observes

Thieves Return \$75,000 in Loot: (Could It Have Been a Hard Sell?)

United Press International SANTA BARBARA, Calif. — The county sheriff's office here is not sure whether the thieves who robbed a residence of up to \$75,000 worth of silver and jewels last summer suffered from guilt or just could not find a fence to buy the loot.

Sheriff's deputies were puzzled over the mysterious return of all the items, which were stolen last June from a house in the exclusive suburh

of Montecito while the owners were on vacation. The couple returned Thursday night and found that hig steamer trunks had been left in their driveway. Fearing there might be bombs inside, they called the deputies, who cautiously opened the trunks. Inside were all the stolen goods.

D EFENSIVE technique has reached such a level of competence these days that unlimbering the 16-inch guns of a powerful mating attack leads not to a quick victory but only to a small leak in the enemy's ship - a leak that must be carefully exploited to end in victory.

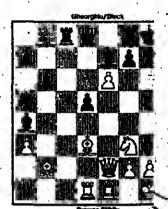

The United States co-champion. Walter Browne , showed in his ecounter with Florin Gheorghiu, a Rumanian grandmaster, in the eighth round of the Hoogoven International tournament in Wijk-aan-Zee, the Netherlands, that he was as skillful with a small advantage as with the allout attack.

The major decision as to what type of defensive formation Black should adopt came up after 6 PxP. The Miles-Seirawan game, Baden 1980, featured Black holding the center hy 6... PxP; 7 P-KN3, B-Q3; 8 B-N2, 0-0; 9 0-0, R-K1; 10 B-N5, QN-Q2; 11N-N5, P-KR3; 12 NxB, PxN; 13 BrN N-B with ground plant plant. Yet BxN, NxB, with excellent play. Yet Gheorghiu took the alternative 6 . . . NxP, conceding the pawn center to White and hoping for later counterplay against it.

B-K2 and that the range of the Black QB would be greatly increased. However, after Browne's 16 QR-Q1!, ac-cepting the sacrifice with 16...NxP (16...BxP?; 17 P-K51, BxB; 18 BxPch, KxB; 19 RxQ wins for Whine): 17 BxN, BxB; 18 B-N5, P-K4; 19 NxP, Q-K2; 20 N-Q7. KB_Q1 - 21 BxP, BQQ2 - 22 B-P

Hess Wins 5th Consecutive Slalom; Phil Mahre Moves In on Stenmark

From Agency Dispatches FURANO, Japan - Erika Hess and Phil Mahre won World Cupslalom ski races here Sunday, the fifth consecutive slalom triumph for Hess and the second in a row for Mahre.

The victory moved Mahre, a 23year-old American, closer to surpassing Ingemar Stenmark of Sweden in the overall standings. Mahre gained 19 points on Sunday, boosting his second-place to-tal to 253 points. Stenmark, seeking his fourth championship. finished third, but his leading total remaioed at 260 under the complicated scoring system.

January with a slalom victory in Schruns, Austria. She subsequently To overtake Stenmark, Mahre must win one of the three remainwon slalom races in Crans-Moning races in Eastern Europe - a tana and Les Diablerets, Switzerslalom and two giant slaloms. land and in Zwiesel, West Germa-

Depth Perception

"I think I was traded because ! knew too much about the inner workings of the club," Cabell said. Tve been in Houston six seasons If one of my teammates wasn't playing, he'd ask me why. I usually know. It gets depressing knowing too much about the club you're with.'

Every few days since spring training began, Cabell and Rich-ard have talked to each other by telephone. "He knows he's not going to be back for opening day," Cabell said, "He's talking about May or June, but his depth perception in fielding line drives or a hard grounder, that's going to be the toughest part for him. "Before we went to spring train-

ing he was throwing to me on a golf course and when I threw the ball back to him, he had trouble catching it chest high on his left side. But he tells me he's doing better oow. He's come a long way."

Hardly able to move or speak after the stroke, Richard underwent emergency surgery for re-moval of part of a blood clot above his right collarbone that obstructed the flow of blood to his brain. Last Oct. 14 he had an 18bour operation to provide a hypass of the clotted shoulder artery.

Richard's Appetite

"The first time I saw him in the hospital, I had to turn away," Cabell said. "He had all these lifesupport tubes in him, he looked awful. When he saw me, he had this little smile on his face. At first nobody else on the Astros was allowed in to see him, just Joe and myself. I went to therapy with him later on. I'd have to scream at him to do what he was supposed to do. He'd bounce a rubber ball but he couldn't catch it.

"And he worked with building blocks, making squares, but it was hard for him. He couldn't do what a little kid could do. That's depressing. He couldn't button his shirt. Or if he did button it, he wouldn't have the buttons lined up right. He couldn't even feed him-

thing was wrong, he doesn't have to throw it back at anybody," Morgan said. "That shows J.R. is at ease with himself. He has great mental strength. That's what's

going to do it for him when he does come back. If he decides to pitch this year, I'll be pulling for him. I just wish he'd wait until

Barfly on the Rocks

Language

By William Safire

NEW YORK - I am having a hard time getting what I want to drink in a bar. Aging bartenders and barmaids usually understand my order, but the cocktail waitress who calls herself a "beverage attendant" operates in a new linguistic world.

Bourbon, neat, soda on the side," I ordered.

"Neat?" "Yeah, neat straight." You mean straight up?" (The pbrase "straight up" was

coined in opposition to "on the rocks"; a martini, straight up, is one Suffre that stands, iced

but iccless, in a glass with a stem. Since most martinis are now served in a short tumbler on ice, or "on the rocks," the noun has now acquired a modifier it never needed before, on the analogy of "day baseball" and "natural turf.")

"No, I don't want it straight up in a glass with a stem — I want it straight, in a shot glass." "Shot glass?"

(A "shot" is the amount of liquor that shoots out of the bottle at a single twist of the wrist, measuring about one and a half ounces, if poured by an experi-enced bartender. The small glass containing that amount — often used as a measuring glass by inexperienced bartenders, or those who wanted to show their patrons they were not being short-shotted - became known soon after the turn of

the century as the "shot glass.") "Any kind of little glass will do. You know the kind you use for orange juice in the morning? Put a shot of bourbon in that. Nn ice --neat."

"Neat?" she asked.

(Because "neat" and its intensi-fied form, "neat-o," have become such universal forms of approbation in current slang, an earlier bartender's meaning - undiluted, or without either a mixer or chaser - has fallen into disuse.)

"Straight up," I said, caving in, "if you like, but in a little glass without a stem. Soda ou the side." "You mean soda back?"

("On the side" originated in food ordering about a century ago. "Potatoes on the side," says Stuart Berg Flexner, author of the Dic-

tionary of American Slang, was first recorded in 1884, and "soda on the side" — originally "soda water on the side" — flowed from that. "Soda water" differed from "branch water," a U.S. Southernism for water from a stream, or branch of a stream, which was first used in the 1850s. "Soda back" is, I think, a Western expression to describe a chaser of soda that stands behind, rather than alongside, the whisky.) "Yes, bourbon straight, with

soda back, with ice, in a highball glass.

"Highball glass?" asked the beverage attendant. (A "highball," which replaced

"long drink," was coined in 1898; "ball" was bartender close for was bartender slang for "glass." The reason for this ball-glass connection is obscure: Perhaps "bail" was the glass manufacturer's name, or bartenders would toss glasses from hand to hand like a ball. "Highball" is now rarely used, having been replaced by "mixed drink" a generation ago.) "A tall glass, I mean, with ice in it, and soda. Back. It helps a little

snort.go down." Snort? ("Snort" - one shot without a

(Short — one shot without a chaser — was first cited in 1889. It was superceded by "belt," as in "a belt of gin," about 1906; that noun might have seemed to come from "punch" or "blow," but actually had to do with putting a drink under your belt. Just as the vogue use of "neat" has obscured its "un-

mixed" meaning, a "snort" now means only a sniff of cocaine.) "Most people say," said the waitress sternly, "Bourbon' or Scotch,' or whatever, 'with a splash." That's what I'll do. For all I

know, she'll hand me a bottle and push me into the swimming pool, but at least I'll stop getting funny looks in cocktail lounges.

. . . As for etymologies for "cock-tail," along with Flexner, 1 prefer the Peychaud explanation: An-toine Peychaud of New Orleans created Peychaud bitters, which flavored the drink he called a co-

quetel, a cocktail. Originally, a cocktail - to he a genuine cocktail - had to contain bitters. Now, with the resolution in liquor linguistics, it could he whisky with a splash and a cherry on top, soda

Nikita Mikhalkov

By R.W. Apple Jr. much less than modernity, energy and success.

- -

New York Times Service MOSCOW — Ivan Gon-charov is one of those nothe story is simply told. Stoltz returns to SL Petersburg from a long trip, rouses Oblomov from his lassitude and introduces him velists who is remembered, at least by the public at large, for to the world of commerce and one character and one character politics, balls and musicales. Obonly. Goncharov, a contempolomov finds it all pretentious and rary of Dostoyevsky, created in boring, but eventually he fails in the eponymous hero of his novel "Oblomov" an archetype of the love with Olga (Yclena Solevei, man with no real role in life. Parone of Mikhalkov's favorite actresses). In the end, however, he alyzed by self-doubt, dithering bungles the romance and she and dreaming, often too trapped marries Stoltz instead. by inertia to rise from his bed, he fritters away every opportunity Pragmatism and Opportunism afforded him, whether profes-

"The oblomovshchina problem sional, financial or romantic. has been replaced in the world by another problem," said Mikhal-kov, a lanky man with a brush In the Soviet Union, he remains one of the best-loved of all literary creations. Mothers still mustache and aviator glasses, dressed in denim jacket, shirt and trousers. "Our problem today is excessive pragmatism, opportuntell their children, when they seem to lack vigor and determination, that they will turn into Oblomovs. Oblomovshchina ---ism, careerism. People are still kind and sensual and thoughtful, oblomovism - has entered the language as a synonym for lan-guor. Lenin, attempting (with only limited success) to rouse the but precisely as much as is convenient for them. They say to themselves, I did what I could,' Russian masses from their centu-ries-old habit of passivity, used to tell them that they must stop and then get on with the crasser parts of life." acting like Oblomovs. Some audiences may be tempted to read the picture as a com-mentary on the staltifying as-

Book's Real Meaning Fading But to Nikita Mikhalkov, at 35 one of the bright sparks of the Soviet film industry, it seemed that while the character lived, the book and its real meaning were dying. "In the schools," he said

in a recent interview at the vast Mosfilm studio here, "they don't so much read it as use it. I took a copy out of a school library, and I found that a few pages were dog-eared from repeated reading — the parts showing Oblomov's character — and the rest were unsolled. The teachers impart the stereotype, but they make no ef-fort to penetrate the essence." Mikhaikov chose the novel as the subject of his fifth film, a two-hour, 25-minute color pro-duction that was shown recently in New York and will open in Paris April 1. In the film, he says, Oblomov

(played by Oleg Tabakov, an ac-tors with an India-rubber face that can compress comedy and tragedy into a single instant) stands for much more than failure, and his half-German, half-Russian friend, Stoltz, stands for

pects of Soviet society, as a criti-cism of a system that, Stoltz-like, eschews the traditional Russian

values of sentiment and generosi-

ty in favor of material progress

Oleg Tabakov as "Oblomov."

Russian Director Confronts the Spirit of 'Oblomov' And Assesses the Booming Soviet Film Industry

But Mikhalkov appears to he making a point that extends well beyond the peculiarities of Soviet ¥.7.952

-

INTERNATIONAL HERALD TRIBUNE, MONDAY, MARCH 16, 1981

From the era of high Stalinism in the late 1930s through the late 1950s, nearly all Soviet (films were vehicles for propaganda; they became the classic example of Soviet realism, designed to instruct and uplift the proletariat. For every Eisenstein, for every "Battleship Potenkin," Soviet film factories churned out hundreds of artistically worthless pictures by politically reliable directors.

There are still Soviet propaganda films, especially those dealing with World War II (or the great patriotic war, as it is known here). But the most talented Soviet directors have long since loosened the vise of conformity, and even the war pictures impart their message with less clumsiness than tacy once did. Censorship is less stringent and filmmakers have learned that they can speak with more indi-viduality if they set their pictures in the past or avoid the overly political. Andrei Tarkovsky ("Saloris"), Andrei Mikhalkov-Konchalovsky ("Siberiade") and Otar Ioseliani ("Pastoral"), as well as Mikhalkov are leaders of

a Soviet new wave. **Big Business**

The state, of course, controls all production, distribution and exhibition facilities. No fewer than 39 studios are scattered around the country, of which Mosfihm is by far the largest, and the small operation in the Georgian republic perhaps the most innovative. Last year, they turned out 360 full-length fea-

Attendance figures, if accurate, are astounding. Official statistics show that almost 3.5 billion movie admissions last year; in a country of 267 million. That means that each man, woman and child went an average of roughly 13 times, Admission prices are low (40 cents for matinees, 75 cents for epics). Pictures like "Oblomov"

made on location at a cost of \$1.8 million — are seldom big box-office successes; audiences here, Mikhalkov said, "want ac-

Director Mikhalkov

tion and films from India." but "Oblomov" has still drawn 10 million customers since its release in 1979. So great is the appetite for films that almost none fails at least to break even --- and to Mikhalkov, that is part of the problem with the Soviet industry. "The problem isn't getting the studio to let me make what I

want to make," he said. "The problem is how to keep those who can't make movies from making them and poisoning the public's taste.

"In this country, the state must provide a job for every graduate. These people spend five years of their time and the state's money in training, so they get a job. But not all of them have talent, and people without talent don't have the right to make films."

Performance in 'Siberiade' Mikhalkov still works as an actor; his performance as a womanizing oil driller in "Siberi-ade" was one of the highlights of the film, Trained first as a stage actor, then at the Moscow State Cinema Institute, he scored his breakthrough as a director with "A Slave of Love," a sentimental account of filmmakers caught up

in the 1917 revolution. In that film as in "Oblomov," Mikhal-kov reveals his affection for seemingly ineffectual people. He oever mocks them.

Perhaps because he is the son of a well-known Soviet poet, Sergei Mikhalkov, the director is

scribes as "a crutch, in most cascs, for a weak screenplay." But in this case, the narration "was quite premeditated. "In this novel, it is important to preserve the music of the lastguage, the flow, the melody. Goncharov's words have a bypnotic, hazy quality about them that comes across even if you don't speak Russian, the same way Shakespeare's do. The individual words melt into something like a river that flows through the

preoccupied with words as well as images. As a result, "Oblo-mov" has a spoken narration — something Mikbalkov bimself de-

tion." Thus, at the crucial moment where Oblomov lolls in a meadow, lulled back into passivity by the light and color and the sounds of birds and insects, when he should be pursuing the love of his life, the scene is not only de-picted in medium shots and

It is not that Mikhalkov is cut off from Western models (as is the case, for example, with many Soviet composers). He knows the classics from the film libraries, and he travels abroad often enough to see the latest products of the United States and Europe. (His trip to New York for the "Oblomov" opening was his fifth visit to the United States in four years). He knows and admires the work of people as diverse as Ingmar Bergman, Milos Forman, Bob Fosse and John Ford, and he is a good friend of Francis Ford Coppola's.

The special technique of "Ob-The special technique of "Ob-lomov" was chosen, he said, not out of ignorance but to convey a sense of time and place — and the dreaminess of Oblomov him-self. For his next film, based on a group of modern stories, Mikhal-kov has used an entirely different approach, and it is this restlessness, this spirit of experiment, that has brought new vitality to the Soviet cinema after so many years in the sterile wasteland of socialist realism.

Reagan in Restaur

President Rengan and his Nancy, joined 100 or so friends Le Cirque, the fashionable York restaurant after watching son perform in a theater pro-tion Saturday. For the restaur a tis 3.4 fr

Nya Li

presidential party would be may ran-guests of Mr. and Mrs. All gold a Bloomingdale at his restaurant. Fas with served rules of secrecy, but them fail. Cirque was visited almost daily for of a inspectors from the city's Heat fair with Buildings and Fure Department dies and the federal Food and D. For Administration as well as agents of the Secret Service as a crut the FBI. By noon Saturday FIS ary "" inspectors were on duty in the U kitchen, checking all ingredier's for and preparations in an effort fae U, minimize chances of contamined, "N-tion of food. Nnt all of their ng told ings pleased Sailhac. "They was room sauces to he cooled rapidly mbac from hot to cold in 30 minutes s ick a bacteria do not develop." he sais 00 ef "But I think for flavor and texture e en sauces should cool slowly. But, Gribun course, for today we will do it the arear way." During an intermission i Super B. He is a

way." During an intermission if or the Broadway musical "Sugar B: if a bies," in which his son, Ron, dand if es, Reagan went backstage to gradied i the stars, Mickey Rooney and Analysis Milker (1) Miller. Former President Jimmy Carterney or has signed an agreement with Bar, up tam Books Inc. to publish hill of

White House memoirs, accordingerar, to Bantam spokesman Stewart Arthon plebann. Two sources within firmed at range of the negotiations estimate light the figure to be between \$1 millior: t \$ and \$1.5 million. Bantam acquirest wh both the hardcover and paperbaciar apr both the hardcover and paperbacia-Maru publishing rights for the United II I States and Canada for the as-yen in the untilled memoir, which Carter be a sin-gan writing last week. "It is out a sin-understanding that it will cover har four years in the White House, in the cluding his domestic and persons of the strain and will experied for the sin-

affairs, and will examine foreigne and political matters as well," Apsi Papiebaum said * * * Rock guitarist Eric Clapton, 35
